

(a) Feature Tracking

TempestExtremes (6 h)

PyFLEXTRKR (1 h)

(b) Cloud Type Classification & Combine Feature Masks

- Aggregate 1-h MCS masks to 6-h, classify non-tracked cloud types
- Combine with 6-h TC, ETC, AR masks

(c) Co-occurring Feature Identification

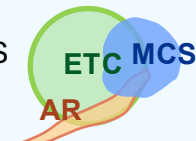

TC Filter

- Remove MCSs near TCs

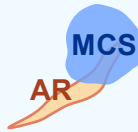

3-way Detection

- Identify ETC-AR-MCS 3-way overlaps

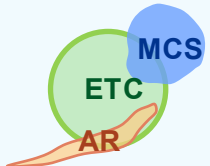

2-way Detection

- ETC-AR
- ETC-MCS
- AR-MCS

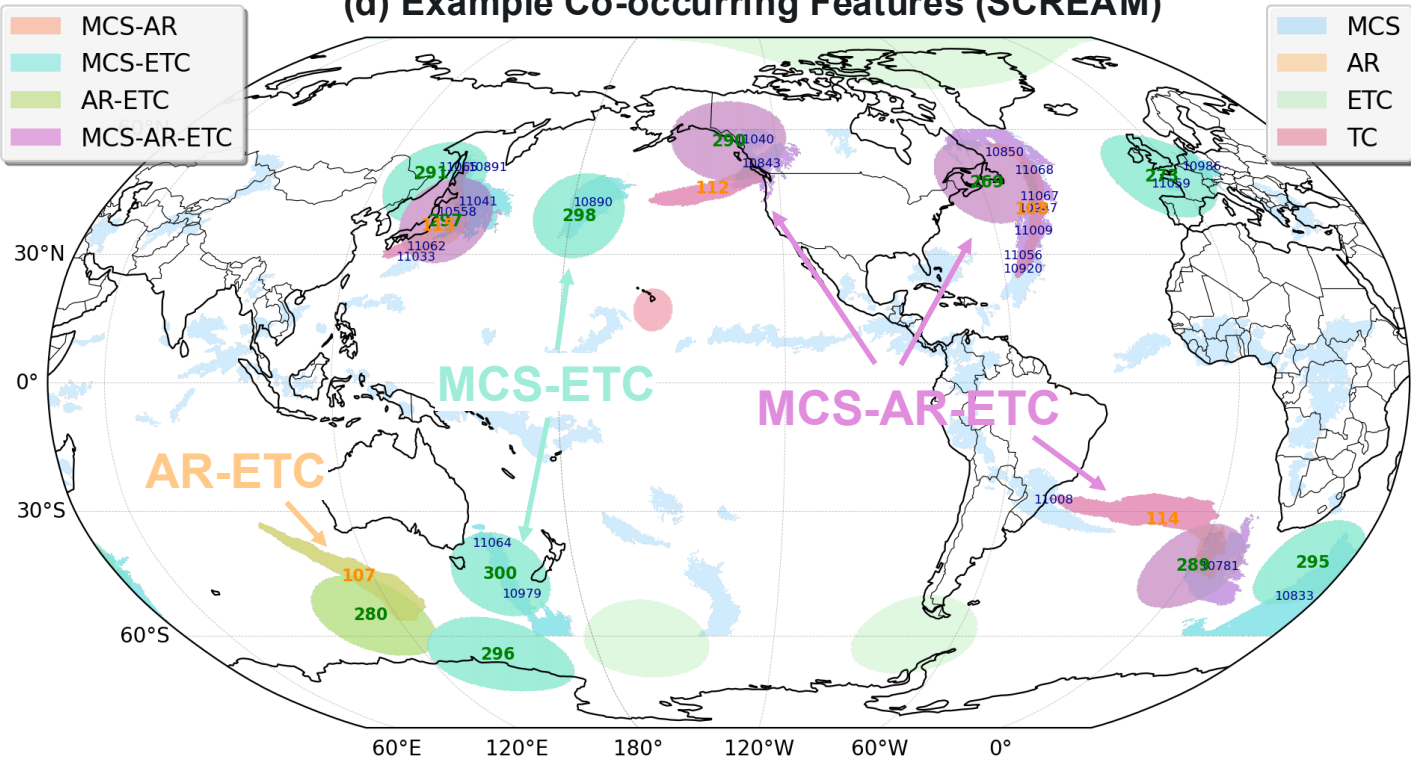

2-way ETC Promotion

- Promote 2-way ETCs with ARs & MCSs

	MCS	AR	ETC
3-way	20%	10%	0%
MCS-AR	20%	—	—
MCS-ETC	20%	—	0%
AR-ETC	—	10%	1%

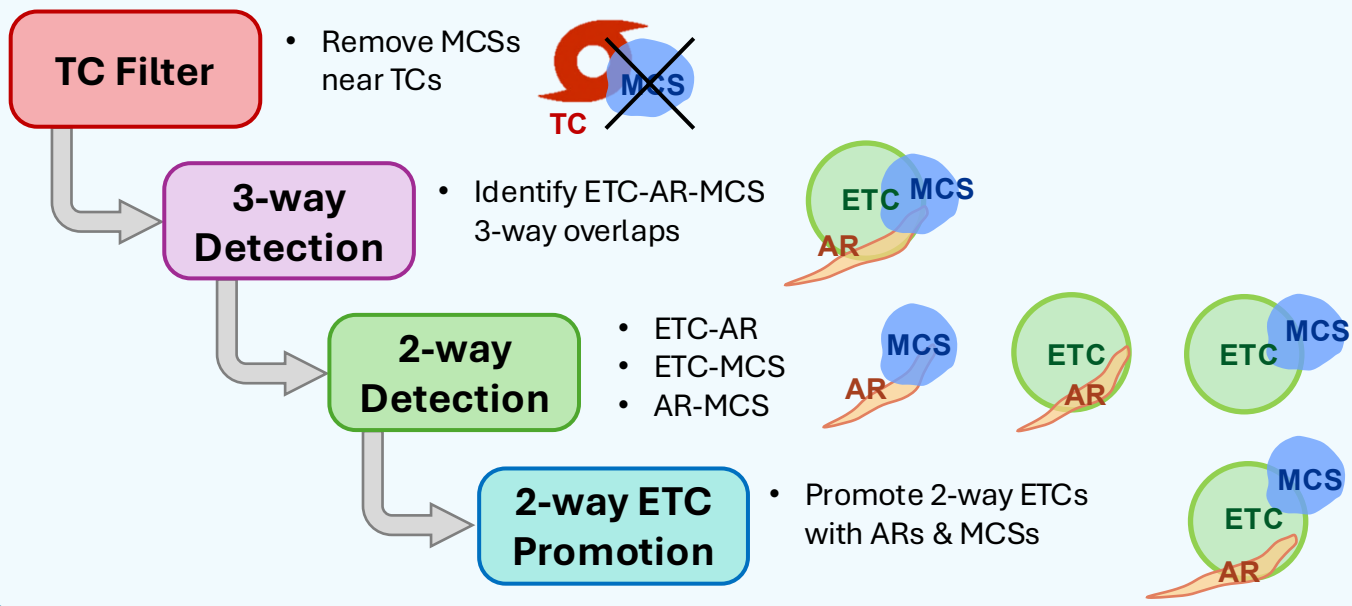

(d) Example Co-occurring Features (SCREAM)

(a) Feature Tracking

(b) Co-occurring Feature Identification

(c) Example Co-occurring Features (SCREAM)
